What is PAUL?

- Integrated system to manage many issues of the university
- Central database
- Rich client front end for administrative tasks
- Web client front end for students and teachers

(System demo later)
What is PAUL good for?

- Achieve one centralised platform for organisation, information and activities related to all matters of your studies

- Improve service for students
  - Online registration: avoid queuing
  - Online access to learning material, news, calendar, results of exams...

- Improve service for lecturers and administrative staff
  - Supports administrative processes: efficiency
  - Supports planning processes: lectures, rooms, time tables, …
  - Possibility of direct communication between lecturers and students via messaging components (PAUL system messages)
You can reach the website at:

https://paul.uni-paderborn.de

After the log-in you may change to the English version

Attention: to log in you need an IMT account and password!

Something went wrong? Corrections can be made by

- ... yourself, as long as the online registration phases are running
- ... the course manager of your institute, as long as no exam registrations have been made in the wrong context
- ... the central examination office

It may sound complicated.

But remember: If something goes wrong ....
